Meteorologist's View

Hazardous conditions in early rain, hill fog and risk of hail, thunder.

Forecast for Sunday 31 Oct 2021

Weather: Continuing with the mix of rain or showers. This time the longer periods of occasionally heavy rain should clear sooner, before mid-morning. Thereafter some limited brighter spells between quite frequent showers, with some turning heavy, bringing the risk of hail and thunder.

Maximum wind: South to Southeast beginning 35ph with gusts to 50mph across most exposed ridges and summits, easing a touch late in day.

Chance of cloud free mountain/hill tops above 800m: 10% at first becoming 70% from mid-morning for any given time, but little chance of prolonged clear conditions due to the showery nature of the flow.

Visibility: Moderate or poor in early rain and occasionally in later showers, also very poor in hill fog with bases extensive in early rain, sporadically in later showers from 450m.

Temperature: **Valleys:** Plus 7 Celsius increasing 13 Celsius during the afternoon
At 800m: Plus 4 Celsius
Freezing level: Above all summits
